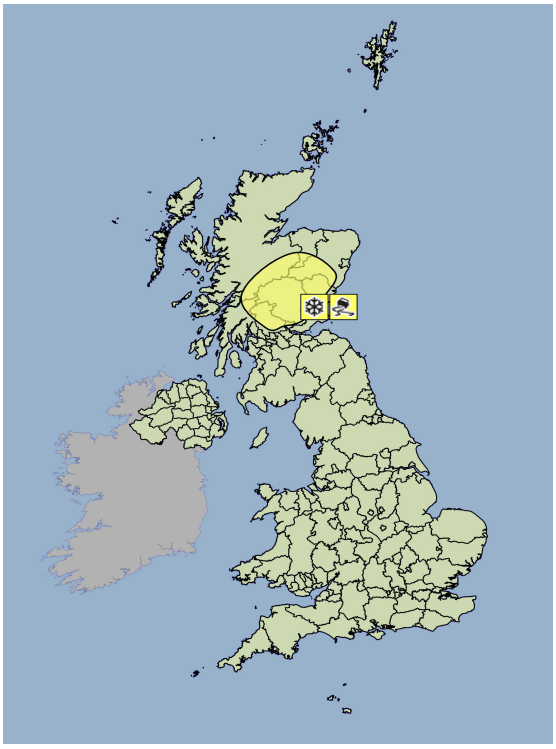
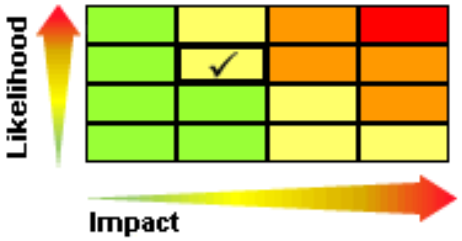
National Severe Weather Warning Service





Chief Forecasters Assessment
After a cold night, warm and moist air will spread northeastwards across Scotland today, with precipitation falling as snow for several hours, especially over high ground.

The Met Office have issued a **Yellow Warning** of **Snow and Ice**

Valid from **09:00 on Tue, 01st Dec 2015** until **12:00 on Tue, 01st Dec 2015**

Rain will continue to move northeast across Scotland on Tuesday morning, falling initially as snow which will accumulate in places. Snow accumulations at low-levels will vary across the warning area, though up to 2cm are possible, with 5cm above 200m and 10cm or more above 500m. Snow will turn to rain again as much milder conditions follow from the southwest by the afternoon.

Be aware that there could be some disruption to travel.

The warning area has been updated to remove northeast England and southern Scotland where snow and ice is no longer expected to be disruptive.
